MODULAR FLOORING

ICE RINK COVERS ICE ARENA PROTECTIVE FLOORING

EVERBASE3 (AF)

EverBase3® AF (Arena Floor) is specially designed to cover ice rinks, allowing them to become true multi-purpose venues for events such as concerts, parties, corporate events, festivals, and other sporting use.

EverBase3 sections feature an integrated bottom layer that closes off flooring modules and provides additional insulation. Air is trapped between plastic layers and structural cross ribbing, providing a transition from the colder ice to the warmer ambient room temperature above.

PROTECT YOUR ICE SURFACE

Drive forklifts, roll equipment cases and place chairs and staging on top of EverBlock Flooring, as the integrated structural cross-ribbing provides high strength, durability and weight loading capacity.

Park cars or other vehicles on the floor for car shows and other on-ice events.

EASY TO INSTALL AND REMOVE

EverBase3 ice rink flooring transports in 3ft x 4ft panels, allowing for rapid installation by a minimal crew. It takes 5-6 people about 1-2 hours to install a full sized NHL ice rink (85 x 200) of flooring and only slightly longer to install an Olympic Sized Rink (30m x 60m), meaning that your venue can be used for sports one day and a concert the next.

EverBase3 ice rink flooring modules connect in a matrix, creating a seamless floor that is both attractive and safe for large audiences. You can even leave out sections of the floor to show the ice below, while maintaining the integrity of the surrounding floor.

EverBlock flooring is durable and can withstand the rigors of daily rink use. Sections are reinforced with structural cross ribbing and manufactured using a high-impact Polypropylene plastic for long life and rugged daily use.

When sections are connected, the connector clips are protected from damage and keep flooring together under heavy traffic.

EverBlock portable ice rink flooring features a sand-blasted anti-slip surface, which is both easy to clean and provides good traction for visitors.

EverBase3 is water, chemical, and weather resistant and is easy to clean using standard cleaning fluids or a pressure washer.

USE FOR:

- Concerts
- Sub-Floor For Basketball Courts
- Graduations & School Assemblies
- On-Rink Events & Parties
- On-Rink Trade Shows & Exhibitions

MODULAR FLOORING

ICE RINK COVERS ICE ARENA PROTECTIVE FLOORING

EverBase® 3 (EBF3) is an 18" x 24" modular flooring tile that serves as our general purpose event flooring system. It can be used for a multitude of applications.

From hockey and ice skating one day, to concerts and events the next, EverBase3 is designed for rugged, everyday use, indoors and outside. Due to its larger module size, it provides greater rigidity than competing systems and connects seamlessly with other versions of EverBlock Flooring for the ultimate in functional and design flexibility.

EverBase 3 modules come pre-assembled in 3ft x 4ft sections for ease of transport and storage.

UNDERSIDE

EVERBASE3 (EBF3) SPECIFICATIONS

Modular flooring tile that serves as our general purpose event flooring system. Modules come pre-assembled in 3ft x 4ft sections for ease of transport and storage.

Material: EverBase3 is manufactured using high-impact polypropylene, co-polymer plastic, that contains impact modifiers for improved flex-modulus and long term durability.

Surface Dimension: 18" x 24" (3 Sq/ft of coverage per module)

Height: 1.1" **Weight:** 3.61 lbs per module

Color: Light Grey (EBF3 ST)

*custom colors available with minimum orders.

INSTALLATION

To install EverBase 3 AF we recommend dry-cutting your ice prior to installation and maintaining ice temperature at approximately 30 degrees Fahrenheit.

Installation is quick and easy due to EverBlock's unique rapid connection system, which allows sections to be nudged into position on ice and locked with a simple downward step.
